

## Character Spacing & Double Strikethrough

### Character Spacing

Normal spacing (0pt). Expanded +2pt. Expanded +5pt.

Condensed-1pt. Normal again. Condensed -0.5pt.

This entire paragraph has expanded spacing of 3 points applied to every character. This tests how character spacing affects line breaking and text width calculations across a longer block of text.

Tight condensed text at -15pt spacing to test negative values

### Double Strikethrough

Normal text, then ~~double strikethrough text~~, then normal again.

~~**bold double strikethrough combined**~~

### Combined Formatting

~~Expanded +3pt with double strike~~ mixed with condensed-1pt no strike.

A longer paragraph mixing expanded and condensed spacing. This part is condensed. Back to expanded. And normal to finish.
